Trial copies of these programs are available for \$4 each. Send your checks to Shareware, P.O. Box 4101, Lakewood, CA 90711. Please indicate 5 1/4- or 3 1/2-inch disks.

TEXT:

Shareware programs are available from computer bulletin boards and computer clubs. Users try them, then pay a fee to register them if they decide to use them regularly.

TOPP'S GROCERY PROGRAM -- With the cost of food as high as it is, you'd be foolish not to clip coupons from your newspaper's food section or Sunday supplements. Some people have cut their grocery bills by 20 percent by using coupons and rebates.

Topp's Grocery Program helps you organize all those coupons and rebates, prepare shopping lists and track grocery expenses and savings. Once the coupons have been clipped, you enter the kind of coupon, the brand, the expiration date and the amount and file it in a data base. Then when you are ready to shop, you search for the kinds of coupons you need.

You can get printouts of your coupon list, or simply call the list to the screen. Aside from its ease of use, this grocery program has some of the nicest screen graphics we've seen in a shareware program for IBM and compatible computers. It will work on monochrome monitors as well as color.

To register, send \$29 (\$34 for an enhanced version) to Topp's Home Software Company, 16541 Redmond Way Suite 242, Redmond, WA 98052.

FORMULA1 -- If your scion is contemplating attendance at a fine college, he or she had best brush up on algebra. Here is as inexpensive a tutor as you'll find.

Formula1 is the first part of a high school or college algebra tutorial that deals with such subjects as quadratic equations. Progress is measured, and if the student falters the tutor raps his or her wrist with a ruler. Just kidding.

Whether you are a high school or college student just getting your feet wet with algebra or an anxious parent, here's a tutorial that really works.

To register, send \$52.50 to Intelligent Computer Tutorials, P.O. Box 820725, Houston, TX 77282-0725. Texas residents need to add sales tax.

TIMESTAX -- It's not often that a shareware developer waxes this eloquent, but the folks at Johnson Technologies say this about their time-management software: "You say you work in a big company and don't need to account for every minute of your time? But when you're overdue on that three-month project the boss is yelling about, wouldn't it be nice to have the hard evidence that you spent exactly 34 percent of your time in useless status meetings with him? Or 16 percent of your time on those 'one-time-only reports'? Or 11 percent playing telephone tag? Or 3 percent actually getting some work done?"

Most of us would do this kind of calculation just for exercise. The real purpose of TimeStax is to help you track the time you spend on projects through a time card approach. You might not want your friends in the

TEXT:
SUNNYVALE, CALIFORNIA, U.S.A., 1996 APR 25 (NB) -- Internet search and
navigation specialist, Yahoo(NASDAQ:YHOO) now offers an interactive
feature which allows users to enter an address and display amap
identifying the address by an X. Working with Proximus Corp., also of
Sunnyvale, California, Yahoo 's new feature immediately offers mapping
information for 50 US cities as the company builds a total database of
2,500 cities.

Two weeks after its initial public offering (IPO) on the NASDAQ exchange,
Yahoosays it is fulfilling a promise to enhance its basic Internet
searching service with detailed regional and community content and
features. The new mapping feature also identifies one-way streets, main
thoroughfares, and most surrounding street names. Yahooexpects the
service will be helpful to many drivers and travelers across the US.

Proximus, a new company providing the necessary mapping technology to
Yahoo , offers World Wide Web sites the capability to add Geo-Enabled
content and services. According to the company, any Web site which contains
office, residential, event, and other location content can easily add
mapping features and services. Using Proximus MapQL query language, the
company claims Web developers can addmapdisplays and searches in one
day.

To findYahoo 'smapfeature, Web users need to direct their browser to
http://www.yahoo .com , select the "Science" category, followed by the
"Geography" category, "Maps" category, and then "Yahoo !Maps " area. A
simple screen presentation allows a user to enter an address and city. The
returnedmapmay be scrolled to the north, south, east and west.

Speaking to Newsbytes, Yahoospokesperson, Jennifer Hunn, said, "Our idea
is to make something which helps your daily life. Whether you are a
corporate executive or a home computer user, you will find information you
need for everyday life."

She added, "Through our Web site, you can get stock quotes, telephone
numbers, the weather, e-mail addresses, Web sites, and other content. We
intend to create more regional content such as our new mapping feature."

Newsbytes also learnedYahooplans to develop deeper integration of its
mapping feature into otherYahooWeb areas. For instance, when a user
searches for local weather, a particular company, or an address, a related
mapwill be available. Hunn also said the additional US cities will be
added gradually in the coming months.

efficiency department to get their hands on this -- until you run it first.

To register, send \$49.95 plus tax to: Johnson Technologies, 10564 N. Blaney Ave., Cupertino, CA 95014.

CON-ED -- Version 2.4 of Configuration Editor lets you pick appropriate autoexec.bat and config.sys files as you boot up or create one on the fly.

Configuration Editor is useful to power users, people on a network and others who enjoy messing with arguably the two most important files on your IBM or compatible personal computer.

If you feel adventurous, or if you really need a program like this, send \$10 to register to Ira T. Ashkenes, 10288 Abbott Road, Manassas, VA 22110.

TEXT:

SUNNYVALE, CALIFORNIA, U.S.A., 1996 APR 25 (NB) -- Internet search and navigation specialist, Yahoo (NASDAQ:YHOO) now offers an interactive map feature which allows users to enter an address and display a map identifying the address by an X. Working with Proximus Corp., also of Sunnyvale, California, Yahoo 's new feature immediately offers mapping information for 50 US cities as the company builds a total database of 2,500 cities.

Two weeks after its initial public offering (IPO) on the NASDAQ exchange, Yahoo says it is fulfilling a promise to enhance its basic Internet searching service with detailed regional and community content and features. The new mapping feature also identifies one-way streets, main thoroughfares, and most surrounding street names. Yahoo expects the service will be helpful to many drivers and travelers across the US.

Proximus, a new company providing the necessary mapping technology to Yahoo , offers World Wide Web sites the capability to add Geo-Enabled content and services. According to the company, any Web site which contains office, residential, event, and other location content can easily add mapping features and services. Using Proximus MapQL query language, the company claims Web developers can add map displays and searches in one day.

To find Yahoo 's map feature, Web users need to direct their browser to <http://www.yahoo.com> , select the "Science" category, followed by the "Geography" category, "Maps" category, and then "Yahoo ! Maps " area. A simple screen presentation allows a user to enter an address and city. The returned map may be scrolled to the north, south, east and west.

Speaking to Newsbytes, Yahoo spokesperson, Jennifer Hunn, said, "Our idea is to make something which helps your daily life. Whether you are a corporate executive or a home computer user, you will find information you need for everyday life."

She added, "Through our Web site, you can get stock quotes, telephone numbers, the weather, e-mail addresses, Web sites, and other content. We intend to create more regional content such as our new mapping feature."

Newsbytes also learned Yahoo plans to develop deeper integration of its mapping feature into other Yahoo Web areas. For instance, when a user searches for local weather, a particular company, or an address, a related map will be available. Hunn also said the additional US cities will be added gradually in the coming months.
